H2P2 Implementation Activities of the Subarea Health Planning Councils (SACs)

- | | |
|-----------|---|
| Hawaii | H2P2 Chapter on Behavioral Health: The Hawaii SAC is proceeding with the grant project. UH presented data from the survey on transportation needs of those seeking behavioral health treatment. During the months of October and November, eight community forums will be held in conjunction with the Hawaii County Office on Aging to gather additional information related to transportation needs. A January 2003 conference is planned to pull all the data together and to brainstorm possible solutions. |
| Honolulu | H2P2 New Chapter Development: Members are working on developing a new chapter to H2P2: Long Term Care. Initial content will focus on the elderly. Last month's discussion was on measures/indicators. Identified as a probable 'first' among these indicators is a comprehensive health exam for all persons 65+. |
| Tri-Isle | Before selecting their next H2P2 project, the SAC is updating their information about health resources in Maui County. Their October guest presenter spoke about Maui Memorial and Maui County's long term care issues. |
| Windward | The SAC is considering potential projects to address hypertension, H2P2 Chapter on Heart Disease and Stroke. Many of the SAC members remain active with the Windward Oahu Asthma Coalition, an entity formed as a result of the SAC's efforts. |
| West Oahu | West Oahu SAC members are on sabbatical for the summer. |
| Kauai | H2P2 Chapter on Behavioral Health: Awaiting approval of grant application submitted by partner, the Kauai Drug Free Coalition (formerly called the Kauai Drug Abuse Coalition). Funds are needed to produce and disseminate updated info cards on Kauai's drug treatment community resources. |

Research and Statistics:

Website stats: During September of 2002, the SHPDA website had 8,899 hits. The majority visited our "Health Policy Guidebook," and the new section on active Certificate applications' Executive Summaries has become quite popular too.

Utilization Report: The 2001 SHPDA Inpatient Utilization Survey results were published and distributed. This report was also loaded to our web site at www.shpda.org.
